

SUMMARY

Service supervisor turned automation builder. Five years with **Gula Cakery Group** maintaining floor standards and training staff on menu, allergen and hygiene compliance — and the reporting work there is what pushed me into automating things. I now design and ship **AI agents and workflow automations**: webhook-driven order systems in n8n that validate their own data and log every run, scheduled agents that read email and calendar and report to Telegram, and multi-step Zapier approvals. **Four workflows published and running**, plus a live storefront I built and deployed end to end.

AUTOMATION & AI PROJECTS

Super Agent Daily Briefing — scheduled AI agent Published

- Built an n8n agent that runs unattended on a schedule, reads the day's important emails, filters job alerts against saved criteria and checks tomorrow's calendar, then writes a prioritised briefing to Telegram.
- Scoped each data source as a separate tool call rather than dumping whole inboxes into context — keeps output readable and token cost predictable.

n8n · GPT-5 Mini · Google Gemini · Gmail · Google Calendar · Telegram — last run 36.9s, ~9,270 tokens

Homebody — storefront and order CRM Live

- Designed, built and deployed a furniture storefront with server-validated discount logic: the code is checked before the total drops and again when the order is placed, so it can't be reused.
- Wired the store to a 9-node n8n workflow that validates each order field by field, sends confirmation and first-buyer welcome emails, and appends every malformed order to a Sheets error log instead of failing silently.

n8n · Webhooks · Google Apps Script · Google Sheets · Gmail · Netlify · HTML/CSS

Invoice intake and finance approval Zapier

- Two linked Zaps: the first captures incoming invoices, routes them by currency and checks Google Sheets for duplicates; the second runs a finance review and approval loop through Google Forms.

Zapier · Google Sheets · Google Forms · Gmail

CRM pipeline and prompt-driven reporting GoHighLevel

- Configured a sales pipeline with a 5-part welcome and follow-up email sequence triggered on stage change; connected Calendly to Google Calendar and Meet for discovery calls and onboarding.
- Wrote structured prompts that read mobile-app attendance records and apply statutory overtime multipliers with 30-minute rounding directly into spreadsheets.

GoHighLevel · Calendly · Google Workspace · Prompt engineering

TECHNICAL SKILLS

AUTOMATION	n8n (AI agents, webhooks, conditional branching, wait steps, execution logging), Zapier multi-step Zaps, GoHighLevel workflows
AI	Agent design with tool access and memory; prompt engineering for structured data extraction; GPT-5 Mini, Google Gemini, Claude
INTEGRATIONS	Google Sheets, Forms, Calendar, Gmail, Google Apps Script, Telegram Bot, Calendly, REST webhooks
WEB	HTML, CSS, responsive layout, accessible contrast, Netlify deployment

OPERATIONS

Staff training, allergen and hygiene compliance, inventory and stock control, sales reporting

PROFESSIONAL EXPERIENCE

Floor Staff

June 2020 – Present

Gula Cakery Group, Malaysia

- Supervise restaurant cleanliness and hygiene to meet regulatory sanitation standards.
- Train and brief staff on menu offerings, individual ingredients and allergen awareness, including how to raise these with customers.
- Maintain service quality and consistency across shifts; ensure prompt, friendly customer service.
- Awarded a Certificate of Appreciation for 5 Years of Service, December 2025.

Floor Staff

December 2019 – March 2020

Brotzeit, Mid Valley, Malaysia

- Served food and beverages and advised guests on menu items.
- Applied safety and sanitation policies for food and beverage handling, and followed outlet procedures and service standards.

Kitchen Assistant

January 2016 – November 2018

Haru Café, Malaysia

- Assisted cooks with service preparation, prepared vegetables and meat, and produced sauces to recipe.

Stock Clerk

January 2013 – December 2014

Robinsons Place Bacolod, Philippines

- Received and verified incoming stock for completeness and damage, and produced written receiving reports — the same check-then-log discipline the order workflows above automate.

Sales Clerk

December 2011 – June 2012

Robinsons Place Bacolod, Philippines

- Merchandised product displays, carried out inventory counts and compiled sales reports.

ACHIEVEMENTS

- **Certificate of Appreciation — 5 Years of Service**, Gula Cakery Group, December 2025.
- **Self-taught automation practitioner** — built and published four production workflows, two AI agents and a live storefront while working full time in hospitality.
- Designed the HOMEBODY order pipeline so valid orders confirm, follow up and log themselves, with malformed orders written to an audit log rather than failing silently.
